Experience

Frontend Developer Intern - Aarvasa — Jan 2026-May 2026

- Built and deployed 2 production websites from scratch using React.js for two different clients, owning the frontend lifecycle end-to-end.
- Collaborated within a 15-member cross-functional team (engineering + Tech HR), translating client requirements into responsive, production-ready UI with reusable component architecture.

Projects

LeadPilot AI – Multi-Agent Sales Intelligence Platform — June 2026- July 2026

- Built an AI platform that researches companies, qualifies leads, and generates personalized sales outreach under 30 seconds.
- Developed a scalable backend using FastAPI, PostgreSQL, SQLAlchemy, and REST APIs.
- Orchestrated autonomous 6 AI agents with LangGraph and integrated Firecrawl and Gemini API for web research and content generation.

StudySmart - AI-Powered Study Companion — May 2026- June 2026

- Developed a full-stack study platform with PDF upload, AI-generated notes, quizzes, mock tests (up to 20 questions per test), and progress tracking.
- Built a context-aware RAG chatbot using LangChain, Gemini API, ChromaDB, and FAISS for document-based Q&A
- Designed scalable APIs with FastAPI and MongoDB, and developed a responsive frontend using Next.js.

HealthPlus – Smart Health Companion — Dec 2025-Apr 2026

- Developed an AI-powered full-stack health tracking platform using Next.js, Firebase, Google OAuth and Tailwind CSS
- Integrated an AI health chatbot (LLaMA 3) and a diabetes prediction system for personalized health insights.
- Built modules for nutrition, sleep, and mental wellness tracking with real-time Firestore data synchronization with 15 tracked metrics.
- Designed team dashboards with leaderboards, group messaging and comparative analytics for multi-user health insights
